# Avatara and Casium Technologies Understands the Manufacturing Space

Our client base is made up of companies that:

- ① Have complexity in their IT environment
- ② Utilize CAD software
- ③ Need to meet compliance standards

DoD contractors are the perfect combination of all three. Avatara develops, delivers, and supports an all-inclusive IT infrastructure that enables you to remain secure, productive, and compliant.

Here's how our technology fits seamlessly into your world:

## Compliance & Documentation:

Avatara's DoD Platform is designed to meet and exceed even the most stringent compliance requirements (including NIST 800-171 and CMMC 2.0) to protect your company, data, and assets.

## Remote CAD:

We provide a completely mobile and secure infrastructure, enabling high performance CAD for remote workers.

## Secure File Sharing:

Safely send and receive CUI from any device.

## US-based 24/7 ITAR Support:

Quick response times are a priority; support is always available via phone, text, or chat.

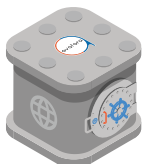

## Business Analytics:

Leverage our data around system availability, security risk, and user productivity to enhance your company's bottom line.

## Machine Compatibility:

From operating CNC machines to entering data from the shop floor, our technology is made to work with yours.

## Managed Security:

Find peace of mind knowing that Avatara is always working to protect you from external attacks and prevent social engineering threats.
